GitHub: https://github.com/abinayasangeetha
Chennai, TamilNadu - India

## Objective

A dedicated engineering graduate with strong foundations in Python, Java, SQL, and object-oriented programming. Seeking an entry-level opportunity to develop reliable software solutions, strengthen problem-solving skills, and grow in a professional engineering environment.

## Education

- **SAVEETHA ENGINEERING COLLEGE** — *May 2026*
  *B.Tech Artificial Intelligence and Data Science* — CHENNAI, INDIA
  - CGPA: 8.5/10
- **SRI VIJAY VIDYALAYA MATRIC.HR.SEC.SCHOOL** — *2021-22*
  *Class:XII* — Tirupattur, India
  - Percentage: 93.8

## Skills

- **Programming Languages:** Python,Java
- **Core Concepts:** Object-Oriented Programming, Data Structures (Basics)
- **Frontend Technologies:** HTML,CSS,JavaScript(basics)
- **Database Systems:** MySQL
- **Machine Learning & Data Science:** Supervised Learning, Classification, Regression, Clustering, EDA, Pandas, NumPy, Scikit-learn
- **Cloud:** AWS(basics)
- **Tools:** Git,GitHub,VS code

## Internships

- **ENGINEERING MONK – VLOG INNOVATIONS** — *July 2024 - August 2024*
  *Data Analyst Intern* — Chennai, India
  - Worked on data cleaning, preprocessing, and exploratory data analysis using Python.
  - Created visualizations and basic analytical reports to support decision-making.
  - Gained hands-on exposure to machine learning fundamentals and real-world datasets.

## Projects

- **AI Powered Multimodal Interview Assistant**
  *Tools: Python, Flask, Google Gemini, OpenCV* []
  - Built an AI-driven interview preparation system that evaluates candidates using text, audio, and video inputs.
  - Generated resume-based technical and HR questions and provided automated scoring for accuracy, communication, and confidence with detailed feedback and reports.
- **Real Time Driver Fatigue Alert System**
  *Tools: Python, OpenCV, Pygame, SVM* []
  - Developed a real-time drowsiness detection system using eye and mouth aspect ratios to monitor driver fatigue.
  - Applied facial feature extraction and machine learning techniques to trigger alerts and improve road safety.
- **Movie Recommender System using Machine Learning**
  *Tools: Python, Pandas, Scikit-learn, NLP, Streamlit* []
  - Built a content-based movie recommendation system using NLP and cosine similarity on movie metadata.
  - Deployed an interactive Streamlit web application for real-time movie suggestions.

## Certifications

- **IBM MACHINE LEARNING** - 2025
- **Wipro Database Solutions** - 2025
- **AWS Cloud Practitioner** - 2024

## ADDITIONAL INFORMATION

**Languages:** TAMIL,ENGLISH,HINDI (INTERMEDIATE),FRENCH(INTERMEDIATE)
**Softskills:** Time Management,communication skills,Team work
